

National Fossil Day Song

Music and Lyrics Copyright © Jeff Wolin

D G D
All across the Earth you can find
D A D
the evidence of ancient life.

D G D
A prehistoric puzzle made out of stone,
D A D
fossils tell us stories about our home!

Chorus:

D G D
Hey, Hey! What do you say!
D A D
Let's have a National Fossil Day!
D G D
We'll think about the Earth's prehistory
D A D
and study paleontology!

D G D
It takes a special recipe
D A D
to preserve the remains of living things!
D G D
Most life on our Earth dies and decays
D A D
so if you find a fossil you should celebrate!

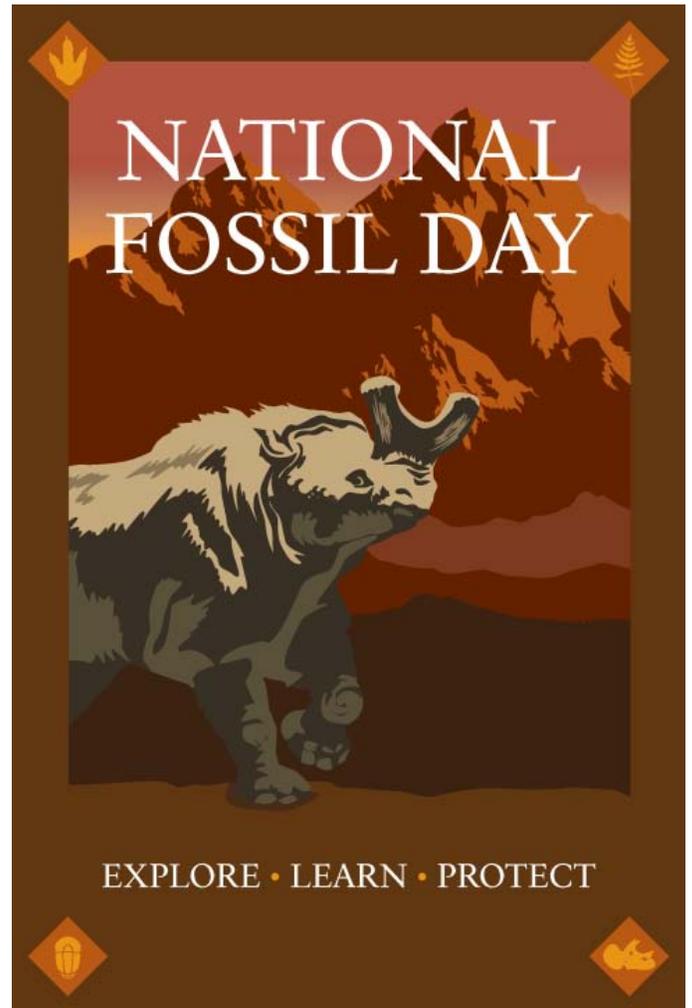

Chorus

G D G D
Dinosaur, ancient horse, short-faced bear
G D A7
ancient reef, cycads, mammoth hair
G D G D
leaves and burrows, tracks and cones
G D A D
bugs, fish, feathers, teeth and bones

Chorus

D G D
Fossils are rare, now you know.
D A D
There's places to collect and places where you don't.
D G D
A non renewable curiosity.
D A D
So go and discover but treat them gently!

Chorus
